

Alumina Lining Pieces

Alumina Ceramic Lining Pieces
Revestimiento de piezas de cerámica alúmina

Chemshun alumina lining pieces including the alumina hexagonal tiles, alumina square tiles, ceramic cylinders, square or rectangular lining pieces with dimples, alumina ceramic blocks. Usually we produce single pieces or stick the small lining pieces tiles on nylon as hexagonal mat 300x300mm, 150x150mm or square mat 500x500mm.

Chemshun Ceramics Advantages

- Tailor Made Engineered Ceramics Available
- Accept OEM & ODM Wear Engineered Ceramics and Project
- Provide Professional Industrial Wear Consult and Solution
- Accept Small & Big Quantity Orders
- Delivery Fast

Factory & Office Address: Non-metal Area of Shangliuyuan, Economic Development Zone
Pingxiang City, Jiangxi Province, P.R. China.Code 337000
Tel: 86-799-6790781,2181002,2181004 Fax: 86-799-6790785

Website: www.chemshun-es.com & www.chemshun.com Email: office@chemshun.com

Advantages of Chemshun Wear Resistance Alumina Lining Pieces

- Excellent abrasion resistance;
- Excellent impact resistance;
- Excellent hardness;
- Excellent corrosion resistance (resist the strong alkaline, strong acid slag, and liquefied materials)
- Excellent heat resistance (up to 1500°C);
- Easily and quickly installation;
- Smooth surface can be reduce barrage and friction coefficient to prolong the device working life. Low density reduce the lined equipment weight and improve the equipment working effectiveness

Technical Datas of Alumina Ceramic Lining Pieces

Properties	Unit	Chemshun 92	Chemshun 95
Al ₂ O ₃	%	92	95
Density Densidad	g/cm ³	>3.6	>3.65
Moh's Hardness Dureza de Moh	scale	9	9
Products	Size in mm (LxWxT) or (SxT)		
Ceramic Square Tile Azulejo de ceramica cuadrado	10x10x2-10, 17.5x17.5x2-15, 20x20x2-20, 33x33x5-25,etc.		
Ceramic Hexagonal Tile Ceramica baldosas hexagonales	11.5x3-20, 12x3-20, 19x3-25,etc		
Ceramic Block Bloque de ceramica	32x32x32, 40x40x40.etc		
Size of Ceramic Mat Tamaño de cerámica de MAT	150x150, 300x300, 500x500		
Material of Mat Material de la estera	Paper, Nylon Mesh, Acetate Cloth

Alumina Ceramic Cylinders

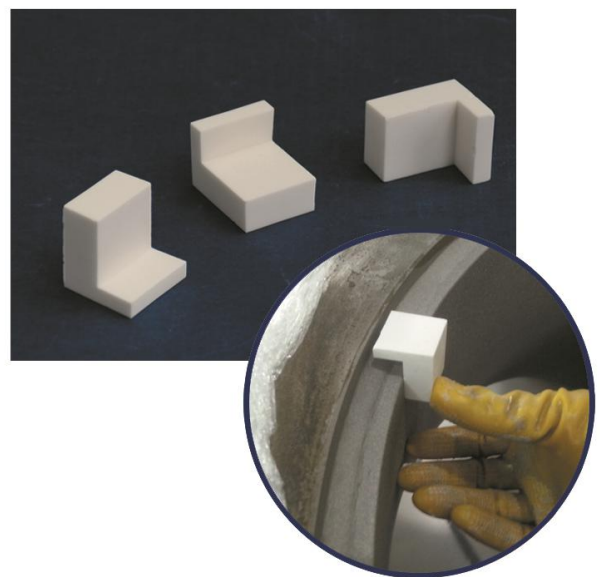

Chemshun alumina ceramic cylinder also called ceramic rod, which vulcanized with rubber and make a new wear protection material: ceramic wear liner. This wear liners with stronger impact resistance, excellent abrasion resistance and easily fixing etc advantage are widely used in mining, steel, power industries. Chemshun popular cylinder size: DxH 31x31mm, 21x21mm.

Special-shape Ceramic Linings

Chemshun can design and produce special-shape ceramics for customer for example all types of ceramic blocks and cubes, lining pieces. The special-shaped ceramics help customer easily and perfectly install on site.

Ceramic Block and Cubes

Chemshun design/produce, OEM, ODM kinds of ceramic blocks and cubes.

Application of Chemshun Alumina Lining Pieces

1. Directly sticking on the equipment surface as the wear resistance material to protect the equipment and reduce the wear. Being the small size, it can be flexible used in the special shape part of devices.

2. Vulcanize Chemshun ceramics lining pieces with rubber or rubber & steel, then make as the ceramic rubber wear liner plate or ceramic pulley lagging. The composition wear liner plates are able to endure strong impact power for materials in big blocks.

Alumina Ceramic Tile Mats

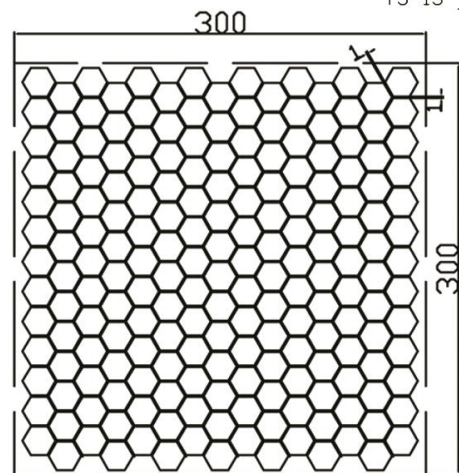

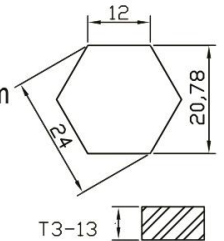

Hexagonal Tile Mat

Standard Tile :

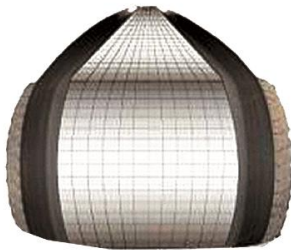

S12xT3mm; S12xT6mm, S12xT13mm

Mat Size:

150x150mm, 300x300mm, etc.

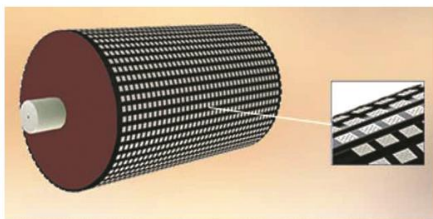

Hexagonal tiles on nylon mesh with 1mm gap between tiles
Baldosas hexagonales en malla de nylon con 1mm brecha entre baldosas

Ceramic on the belt surface directly
Placa en la superficie de la correa directamente

Rubber ceramic wear liner plates
Placas de cerámica de goma del trazador de líneas del desgaste

Rubber ceramic pulley lagging
Cerámica de goma revestimiento de poleas
